## PROFESSIONAL SUMMARY

Backend-focused Python Developer with hands-on experience designing REST APIs and integrating AI/ML models into production-ready systems using FastAPI, Flask, PostgreSQL, and MongoDB. Built 10+ projects across backend services, NLP, and machine learning. Strong DSA foundation with 400+ problems solved on LeetCode (Top 20%). Seeking Backend / AI Developer roles to build scalable, intelligent, data-driven systems.

## EDUCATION

|                                                                                                                          |                                  |
|--------------------------------------------------------------------------------------------------------------------------|----------------------------------|
| <b>Greater Noida Institute of Technology (GNIOT)</b><br><i>Bachelor of Technology in Computer Science — CGPA: 7.2/10</i> | Greater Noida, UP<br>2022 – 2026 |
| <b>Urdu College Gopalganj</b><br><i>Intermediate (12th), Science — 78%</i>                                               | Gopalganj, Bihar<br>2019 – 2021  |

## TECHNICAL SKILLS

**Languages:** Python, SQL, JavaScript, C  
**Backend:** FastAPI, Flask, Express.js, REST APIs, JWT Authentication  
**Frontend:** React.js, Tailwind CSS, Bootstrap, HTML5, CSS3  
**Databases:** MongoDB, MySQL, PostgreSQL  
**AI / ML:** Pandas, NumPy, Scikit-learn, NLP (spaCy, TF-IDF), Matplotlib, Seaborn  
**Tools:** Git, GitHub, Docker, Postman, VS Code  
**CS Fundamentals:** Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                |                |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| <b>Project Management System</b>   <i>React.js, FastAPI, Python, PostgreSQL</i>   <a href="#">GitHub</a>                                                                                                                                                                                                                                                                                       | 2025 – Present |
| <ul style="list-style-type: none"><li>Building a role-based project management platform with separate admin and user panels to manage projects, task assignments, and workflow status updates.</li><li>Developing FastAPI REST APIs with PostgreSQL-backed schema design and authentication/authorization, integrated with a React dashboard for project tracking.</li></ul>                   |                |
| <b>JobFor - AI Job Recommendation System</b>   <i>Python, FastAPI, React.js, MongoDB, NLP</i>   <a href="#">GitHub</a>                                                                                                                                                                                                                                                                         | 2025           |
| <ul style="list-style-type: none"><li>Built a job-matching platform using TF-IDF and cosine similarity to recommend relevant jobs from resume content, integrated with a custom resume parsing pipeline for skill extraction.</li><li>Developed FastAPI backend services and a React.js dashboard to manage user profiles, job listings, and recommendation workflows using MongoDB.</li></ul> |                |
| <b>Flight Delay Prediction</b>   <i>Python, Scikit-learn, Pandas, Flask, React.js</i>   <a href="#">GitHub</a>                                                                                                                                                                                                                                                                                 | 2025           |
| <ul style="list-style-type: none"><li>Built an end-to-end ML pipeline with data cleaning, EDA, and feature engineering on 100,000+ flight records; achieved <b>87% prediction accuracy</b>.</li><li>Exposed prediction through a Flask REST API and visualized delay insights using Matplotlib and Seaborn with a React-based interface.</li></ul>                                             |                |

## ACHIEVEMENTS

|                                                                       |                |
|-----------------------------------------------------------------------|----------------|
| <b>LeetCode</b>   400+ Problems Solved   Rating 1611   Top 20% Global | 2023 – Present |
| <b>Codeforces</b>   Pupil Rank   Rating 1278                          | 2023 – Present |
